Website: <http://soe.cahs.colostate.edu/CE/FESA>

Fire and emergency service departments have a long and proud history of serving their communities through fire protection, prevention and education. The Fire and Emergency Services Administration (FESA) program is designed to provide fire and EMS personnel with the skills needed to lead their department into the future. This online program provides students with the advanced administrative and managerial skills necessary to become a leader in their field. Students will explore key administrative areas such as emergency management, budgeting, human resources and incident command.

A Bachelor of Science degree and a Certificate of Completion are available. All courses are taught completely online, and students are never required to come to campus. Students are strongly encouraged to complete an associate's degree in fire science or a related field prior to enrolling in the FESA program. Contact the program coordinator to find out how your credits will transfer.
